# Bookkeeping Solutions. Alleviating the Burden.

For many business owners, bookkeeping is a burden and a huge obstacle on their journey to success. Our bookkeeping solutions are not only simple and straightforward, they are extremely affordable too.

Remember the good old days, before the introduction of GST, when record keeping wasn't quite so stressful. You simply found all your business records, packed them into a shoebox and delivered them to your accountant. In turn you received your tax statements and financial reports, for a seemingly reasonable price. Your efforts were concentrated exactly where they should be – on running your business.

We bring back those good times – only better. Our bookkeeping solutions are fast, affordable and require very little input from you. Once again, you will have the time to do what you do best, without the hassle of continual reporting tasks. We take the burden completely off you and do it all for you. Those irritating back office functions that probably keep you up at night can be a thing of the past.

Our range of standardised bookkeeping solutions comes in complete, all-in-one packages, which are ideal for Australian small to medium sized businesses.

We understand that no two businesses are the same that is why we tailor our packages from a range of services to assist you with all your financial management needs.

At Logiro we have specialist bookkeepers that are highly experienced in the major software options including MYOB, Quicken and Saasu.

We specialise in using the proven, web-based Saasu system which provides the advanced functionality necessary for any modern business.

The reason we use this system is, quite simply, because it is the best online system available. It is capable of performing all conceivable bookkeeping tasks in a simple and user-friendly manner.

As it is web-based, activation is almost immediate and there is no need for capital expenditure of any kind. These two advantages alone result in significant savings, both in terms of time and cost. The system also provides access to a wide range of professional services which may be needed as your business grows.

Let us take responsibility for your bookkeeping function and you may find that you need to navigate around far fewer potholes on your road to success.
